

Dear *****,

Thank you for kindly providing the information and the mammography images for a radiological second opinion.

Clinical information:

Postmenopause.

Mammography on both sides in two projections from **2024:**

Fibroglandular parenchyma, symmetrically arranged, with multiple, segmentally arranged, monomorphic microcalcifications on the left at 9 o'clock, 28 mm from the nipple, size up to 4.4 cm. Single microcalcification on the right. No pathological RF or architectural defects.

ACR II, Category II right and IVa left.

Assessment:

Multiple monomorphic microcalcifications on the left.

Recommended:

Stereotactic vacuum biopsy on the left at 9 o'clock for histological verification.

Best regards,

Dr. S. Popovich

Radiologist

****2024

Microcalcificates requiring further investigation (verification) according to the guidelines described above.
